GLOVES

- Nitrile Chemical Resistant Gloves -

Especially high and safe protection when working with chemicals

The tear and puncture resistant chemical gloves „**HIGH RISK BLUE**“ for single-use have a material thickness that is twice as thick as on standard **NITRILE** protective gloves. These chemical resistant gloves are suitable for any challenging work that requires safe handling of chemicals and solvents. The fully micro-roughened finish of the gloves enables the user to have a secure grip, even on wet surfaces.
