REUSABLE PRODUCTS

REUSE. REDUCE. RECYCLE

PAPSTAR - FOR EVERY PURPOSE THE „MOST ENVIRONMENTALLY FRIENDLY“ ASSORTMENT

As part of its overall sustainable orientation, **PAPSTAR** began designing its disposable range accordingly more than ten years ago. Already 75 percent of all articles are made of renewable raw materials such as wood and fresh fiber cardboard, palm leaf, bamboo, sugar cane or corn starch.

An ecologically sensible utilization of disposable tableware meets the best possible hygiene standards and a pronounced sense of safety - especially at large events or for away from home consumption in general.

However, **PAPSTAR** no longer appears to be not „only“ a distributor of disposable products, but also as a solution provider for a green future. The company designs material flow management concepts to ensure an economy circular for its (used) products.

However, depending on the location or intended utilization, bowls, plates or containers made of reusable materials are of advantage and more suitable for protecting the environment. According to the legal reusable obligation (Packaging law: § 33), such products, washable and reusable, are now also included in the range.

PAPSTAR's reusable assortment is constantly in transition. We are your reliable partner for individual solutions. We will be happy to advise you.

REUSABLE DRINKING CUPS AND LIDS

The beautifully shaped, stable drinking cups made from high-quality, durable materials can be used again and again. They come with matching lids - the perfect reusable alternative, e.g. for coffee-to-go!

heat-resistant up to 100 °C

RE-USE

REUSABLE OBLIGATION FROM JANUARY 2023

What does the new reusable obligation in the take-away sector mean?

Restaurants, bistros and cafés that sell food for take-away will be obliged to offer their products in both disposable and reusable packaging from 2023. The reusable version must not be more expensive than the product in the disposable packaging. In addition, appropriate reusable cups must be available for all offered sizes of a take-away beverage, and the reusable packaging must not be offered under worse conditions than the disposable packaging. It is permitted to issue the reusable packaging only in return for a deposit, which is then refunded upon return.

Who is affected?

The new reusable offer obligation from the Packaging law is aimed at all „final distributors“ who place food packaging made of disposable plastic and disposable cups on the market, regardless of their material. The final distributors are those who sell take-away packaging filled with food or beverages to consumers, i.e. usually the catering businesses, such as restaurants, cafés, bistros, but also canteens, gas stations.

Are there any exceptions?

Smaller businesses such as snack bars, late-night stores and kiosks that employ a total amount of five people or fewer and have a store area of no more than 80 square meters are excluded from this requirement. Chains, such as train station bakeries, cannot take advantage of the small business exception. Although the sales area of each outlet may be smaller than 80 square meters, if there are in total more than 5 employees working in the entire company, the exception does not apply to them.
